⑦ I once worked with a group of students in the final year of senior school, who listened out for the slang used in their school.

① Slang is actually quite difficult for linguists to find out about.

② You will have your local slang that you use in your school or in your town, and there's no way I would ever know about it unless you told me what it was. (①) ③ Indeed, in your area

you'll probably have several different kinds of slang. (②) ④ The slang that kids use in primary school is likely to be different from

what is used in secondary school. (③) ⑤ If your town has several schools, there are often differences in the kind of slang

heard in each school. (④) ⑥ And there may even be words that are used differently within a single school. (⑤) ⑧ They found

that the slang used by first-year students was very different from their own.

* slang 은어, 속어

① 언어학자들에게 있어서 은어를 파악하는 것은 실제로 상당히 어려운 일이다. ② 학교나 마을에서 사용하는 지역 은어가 있을 것이고, 그것이 무엇인지를 나에게 말해 주지 않으면 그것에 대해 알아낼 방법이 없다. ③ 사실상, 여러분이 사는 지역에는 몇 가지 다른 종류의 은어가 아마 있을 것이다. ④ 초등학교에서 아이들이 사용하는 은어는 중등학교에서 사용되는 것과 다를 가능성이 있다. ⑤ 만약 마을에 여러 학교가 있다면, 각각의 학교에서 들리는 은어의 종류가 흔히 다르다. ⑥ 그리고 심지어 한 학교 내에서 서로 다르게 사용되는 어휘들도 있을 수 있다. ⑦ 나는 이전에 고등학교 졸업반 학생의 한 집단과 일했는데, 그 학생들은 자신의 학교에서 사용되는 은어를 주의 깊게 들었다. ⑧ 그들은 1학년 학생들이 사용하는 은어가 자신들의 것과 매우 다르다는 것을 발견했다.

⑥ By contrast, the Flipped Learning model shifts instruction to a learner-centered approach, where in-class time is spent exploring topics in greater depth.

① Flipped Learning allows for a variety of learning modes. (①)
 ② Educators often physically rearrange their learning spaces to support either group work or independent study. (②) ③ They create flexible spaces in which students choose when and where they learn. (③) ④ Furthermore, educators who flip their classes are flexible in their expectations of student timelines for learning and in their assessments of student learning. (④) ⑤ In the traditional teacher-centered model, the teacher is the primary source of information. (⑤) ⑦ As a result, students are actively involved in knowledge construction as they participate in and evaluate their learning in a personally meaningful manner.

* Flipped Learning 역진행 수업 방식, 거꾸로 교실

① 역진행 수업 방식은 다양한 학습 양식을 허용한다. ② 교육자들은 흔히 학습 공간을 모둠 활동이나 개별 학습을 지원하도록 물리적으로 재배치한다. ③ 그들은 배우는 시간과 장소를 학생들이 선택하는 융통성 있는 공간을 창출한다. ④ 뿐만 아니라, 역진행 수업을 실시하는 교육자들은 학생들의 학습 일정표에 대한 예상과 학생들의 학습 평가에 있어서 융통성이 있다. ⑤ 전통적인 교사 중심 모형에서는 교사가 정보의 주된 원천이다. ⑥ 그에 반해서, 역진행 수업 방식은 가르치는 것을 학습자 중심적인 접근으로 변화시키며, 거기서 수업 시간은 더 심층적으로 주제를 탐구하는 데 사용된다. ⑦ 결과적으로, 학생들은 개인적으로 의미 있는 방법으로 학습에 참여하고 자신의 학습을 평가하면서 적극적으로 지식의 구성에 관여한다.

⑤ However, no one is really interested in taking a trip to see wildlife which is seen as boring or ugly.

① Ecotourists, when it comes to animals, prefer the 'good' and the funny, are in awe of the big, fascinated by the bad, but are not interested in the ugly or the dull. (①) ② Creatures like dolphins and monkeys are seen as good perhaps because they are the nearest creatures to us in terms of intelligence. (②) ③ We also find them aesthetically attractive in the case of dolphins and funny in the case of monkeys, while elephants impress us with their size. (③) ④ We see creatures like snakes and lions as bad and evil killers, but they are still fascinating. (④) ⑥ No one goes tuna watching; we just want our supermarkets to ensure that when fishermen go hunting tuna, no 'nice' dolphins get caught in their nets! (⑤) ⑦ Ecotourists do not seem to want to spend good money to go and see pygmy shrews, anteaters or antelopes.

① 동물에 관한 한, 생태 관광객들은 '좋은' 동물과 재미있는 동물을 좋아하고, 큰 동물을 경외하고, 나쁜 동물에 매혹되지만, 못생긴 동물과 재미없는 동물에는 관심이 없다. ② 돌고래와 원숭이와 같은 생명체는 아마 지능 면에서 우리와 가장 가까운 생명체여서 좋은 동물로 여겨진다. ③ 우리는 또한 돌고래의 경우에는 미학적으로 매력적이고 원숭이의 경우에는 재미있다고 생각하는 한편, 코끼리는 그 크기로 우리에게 인상적이다. ④ 우리는 뱀과 사자와 같은 생명체는 나쁘고 사악한 살인자로 여기지만 그들은 여전히 매력적이다. ⑤ 그러나 지루하거나 못생겼다고 여겨지는 야생 동물을 보러 여행을 하는 데 정말 관심이 있는 사람은 아무도 없다. ⑥ 아무도 참치 관찰 여행을 가지 않으며, 우리는 슈퍼마켓이, 어부가 참치를 잡으러 나갈 때 '좋은' 돌고래가 반드시 그들의 그물에 걸리지 않도록 해 주기를 원할 따름이다! ⑦ 생태 관광객이 많은 돈을 써 가며 난쟁이땃쥐, 개미핥기, 또는 영양을 보러 가고 싶어 하지는 않을 것 같다.

⑤ Later, as the dog learns, the spoken word can be eliminated.

① Obedience training involves teaching a dog to perform certain behaviors at a given signal from the handler. (①) ② These behaviors may be as simple as sitting at the owner's side or as complex as retrieving a selected object after dealing with a series of obstacles or barriers. (②) ③ The signals may be verbal or non-verbal or a combination of the two. (③) ④ Novice obedience instruction involves teaching the dog to respond to a verbal command and an accompanying hand signal. (④) ⑥ Some handlers have so expertly trained their animals that the dog responds to the slightest non-verbal signal, a roll of the eye or the slight flex of a finger. (⑤) ⑦ These signals may be imperceptible to the human audience, but are easily picked up by the trained dog whose full attention is focused on his owner.

* flex 구부리기, 굽히기

① 복종 훈련은 조련사가 주는 신호에 따라 개가 특정한 행동을 하도록 가르치는 것을 포함한다. ② 이러한 행동은 주인의 옆에 앉는 것처럼 간단하거나, 일련의 방해물 혹은 장애물을 처리한 후에 선택된 물건을 가져오는 것처럼 복잡할 수도 있다. ③ 신호는 언어적이거나, 비언어적이거나, 혹은 그 둘의 조합일 수도 있다. ④ 초보적인 복종 지시는, 개가 언어적 명령과 그에 동반되는 수신호에 응답하도록 가르치는 것을 포함한다. ⑤ 나중에, 개가 배워감에 따라 음성 언어는 제거될 수 있다. ⑥ 일부 조련사들은 동물을 아주 전문적으로 훈련시켰기 때문에, 그 개는 가장 사소한 비언어적 신호, 한 차례의 눈동자 굴림, 혹은 손가락을 살짝 구부림에 반응한다. ⑦ 이러한 신호들은 보고 있는 사람들에게 감지될 수 없겠지만, 온전한 주의가 주인에게 집중되어 있는 훈련된 개는 쉽게 알아차릴 수 있다.

④ Another aspect of the same problem, however, is where one member chooses to do more work than the others.

① One of the most frequent problems in groupwork is that not everyone puts the same amount of effort into the task. (①)

② Group members may have a different work ethic or standards for the quality of their work, and this will probably result in different levels of commitment to the group work. (②) ③ While different levels of commitment to the task could be partly influenced by individual workloads, there are wider factors such as individual attitudes to study. (③) ⑤ An overeager member can be irritating to the other members who then reduce their commitment to the work leaving the overeager member to get on with most of the work. (④) ⑥ By taking on more than her fair share, the overeager member may eventually come to feel resentful with her increased workload, even if she volunteered for extra tasks. (⑤) ⑦ This will change the group dynamics and perhaps cause conflicts within the group.

① 집단 작업에서 가장 흔한 문제점 중의 하나는 모든 사람이 다 똑같은 양의 노력을 그 일에 들이지 않는다는 것이다. ② 집단 구성원들은 다른 업무 윤리나 자신들의 일의 질에 대한 다른 기준을 가지고 있을 수도 있고, 이로 인해 집단 업무에 대한 책임감의 다양한 수준이 초래될 수도 있다. ③ 과제에 대한 다른 수준의 책임감은 부분적으로는 개인적 업무량에 의해 영향을 받는 반면에, 개인적 태도와 같은 연구해야 할 더 광범위한 요인들도 있다. ④ 그러나 그 동일한 문제의 또 다른 측면은, 한 구성원이 나머지 구성원들보다 더 많은 일을 하기로 마음먹는 데 있다. ⑤ 지나치게 열성적인 구성원은 다른 구성원들을 짜증나게 할 수도 있는데, 그들은 그러면 자신들의 과제에 대한 책임을 줄이고 그 지나치게 열성적인 구성원으로 하여금 대부분의 일을 하도록 내버려둔다. ⑥ 공평한 몫보다 더 많이 일을 맡음으로써, 지나치게 열성적인 구성원은 자신이 추가 업무를 자원했더라도 결국은 증가된 업무량으로 인해 분노를 느끼게 될 것이다. ⑦ 이것은 집단 역학을 변화시켜서, 아마도 집단 내에서 갈등을 야기할 것이다.

⑥ If the company did well and made a lot of profits, the shares would become worth lots of money, because they would pay the investors lots of money each year.

① Whenever a business wants to grow, it has to find investors, who are people that are willing to give the business the money that it needs. (①) ② In return, the investors get a part of the business' profits (if there are any). (②) ③ Somewhere along the way, someone got the bright idea to divide up a company into "shares" or "stocks". (③) ④ Each share would represent a certain percentage of the profits. (④) ⑤ Men (called "brokers") would gather in downtown New York City and sell these shares to interested investors. (⑤) ⑦ Eventually, the brokers for these large companies moved their business into a building, and the New York Stock Exchange on Wall Street was born.

① 사업체는 성장을 원할 때마다 투자자를 찾아야 하는데, 그들은 그 사업체가 필요로 하는 돈을 그 사업체에게 기꺼이 내려는 사람들이다. ② 그 대가로 투자자들은 (이익금이 있으면) 사업체의 이익금의 일부를 얻는다. ③ 그렇게 진행되는 도중 어느 시점에서, 누군가 회사를 '몹', 즉 '주식'으로 나눈다는 멋진 생각을 했다. ④ 각각의 주식은 흔히 이익금의 특정한 비율을 나타낼 것이다. ⑤ ('주식 중개인'이라고 불리는) 사람들이 뉴욕 시의 중심가에 모여서 이러한 주식을 관심이 있는 투자자들에게 팔곤 했다. ⑥ 회사가 잘하여 많은 이익금을 벌면, 주식은 많은 돈의 가치를 가지곤 했는데, 그 이유는 그 주식이 흔히 그 투자자들에게 매년 많은 돈을 지불해 줄 터이기 때문이었다. ⑦ 마침내 이러한 큰 회사들을 위해 일하는 주식 중개인들은 자신의 사업을 건물 안으로 옮겼으며, 월 거의 뉴욕 증권 거래소가 탄생하였다.

Obedience training involves teaching a dog [to perform / performing] certain behaviors at a [giving / given] signal from the handler. These behaviors may be as [simple / simply] as sitting at the owner's side or as complex as retrieving a [selected / selecting] object after dealing with a series of obstacles or barriers. The signals may be verbal or non-verbal or a combination of the two. Novice obedience instruction involves teaching the dog [to respond / responding] to a verbal command and an [accompanied / accompanying] hand signal. Later, as the dog learns, the spoken word can [be eliminated / eliminate]. Some handlers have so [expertly / expert] trained their animals [which / that] the dog responds to the slightest non-verbal signal, a roll of the eye or the slight flex of a finger. These signals may be [imperceptible / perceptible] to the human audience, but are easily picked up by the trained dog [which / whose] full attention is focused on his owner.

One of the most frequent problems in groupwork [are / is] that not everyone puts the same amount of effort into the task. Group members may have a different work ethic or standards for the quality of their work, and this will probably [result in / result from] different levels of commitment to the group work. [When / While] different levels of commitment to the task could be partly influenced by individual workloads, there are wider factors such as individual attitudes to study. Flipped Learning allows for a variety of learning modes. Educators often physically rearrange their learning spaces to support either group work or independent study. They create flexible spaces in which students choose when and where they learn. Furthermore, educators who flip their classes are flexible in their expectations of student timelines for learning and in their assessments of student learning. In the traditional teacher-centered model, the teacher is the primary source of information. By contrast, the Flipped Learning model shifts instruction to a learner-centered approach, where in-class time is spent exploring topics in greater depth. As a result, students are actively involved in knowledge construction as they participate in and evaluate their learning in a personally meaningful manner.

One of the most frequent problems in groupwork is that not everyone puts the same amount of effort into the task. Group members may have a different work ethic or standards for the quality of their work, and this will probably result in different levels of commitment to the group work. While different levels of commitment to the task could be partly influenced by individual workloads, there are wider factors such as individual attitudes to study. Another aspect of the same problem, however, is where one member chooses to do more work than the others. An overeager member can be irritating to the other members 그들은 그러면 자신들의 과제에 대한 책임을 줄이고 그 지나치게 열성적인 구성원으로 하여금 대부분의 일을 하도록 내버려둔다. By taking on more than her fair share, the overeager member may eventually come to feel resentful with her increased workload, even if she volunteered for extra tasks. This will change the group dynamics and perhaps cause conflicts within the group.

(A) 사업체는 성장을 원할 때마다 투자자를 찾아야 하는데, 그들은 그 사업체가 필요로 하는 돈을 그 사업체에게 기꺼이 내려는 사람들이다. In return, the investors get a part of the business' profits (if there are any). Somewhere along the way, someone got the bright idea to divide up a company into "shares" or "stocks". Each share would represent a certain percentage of the profits. Men (called "brokers") would gather in downtown New York City and sell these shares to interested investors. (B) 회사가 잘하여 많은 이익금을 벌면, 주식은 많은 돈의 가치를 가지곤 했는데, because they would pay the investors lots of money each year. Eventually, the brokers for these large companies moved their business into a building, and the New York Stock Exchange on Wall Street was born.

Flipped Learning allows for a variety of learning modes. Educators often physically rearrange their learning spaces to support neither group work or independent study. They create flexible spaces which students choose when and where they learn. Furthermore, educators who flip their classes is flexible in their expectations of student timelines for learning and in their assessments of student learning. In the traditional teacher-centered model, the teacher is the primary source of information. By contrast, the Flipped Learning model shifts instruction to a learner-centered approach, which in-class time is spent to explore topics in greater depth. As a result, students are actively involved in knowledge construction as they participate in and evaluate their learning in a personally meaningful manner.

Ecotourists, when it comes to animals, prefer the 'good' and the funny, is in awe of the big, fascinated by the bad, but is not interested in the ugly or the dull. Creatures like dolphins and monkeys are seen as good perhaps because of they are the nearest creatures to us in terms of intelligence. We also find them aesthetically attractive in the case of dolphins and funny in the case of monkeys, while elephants impress us with their size. We see creatures like snakes and lions as bad and evil killers, but they are still fascinated. However, no one is really interested in taking a trip to see wildlife which is seen as bored or ugly. No one goes tuna watching; we just want our supermarkets to ensure that when fishermen go hunting tuna, no 'nice' dolphins get caught in their nets! Ecotourists do not seem to want to spend good money to go and see pygmy shrews, anteaters or antelopes.

Obedience training involves teaching a dog to perform certain behaviors at a given signal from the handler. These behaviors may be as simply as sitting at the owner's side or as complex as retrieving a selected object after dealing with a series of obstacles or barriers. The signals may be verbal or non-verbal or a combination of the two. Novice obedience instruction involves teaching the dog to respond to a verbal command and an accompanying hand signal. Later, as the dog learns, the spoken word can eliminate. Some handlers have so expertly trained their animals which the dog responds to the slightest non-verbal signal, a roll of the eye or the slight flex of a finger. These signals may be imperceptible to the human audience, but is easily picked up by the trained dog which full attention is focused on his owner.
